EXPERIENCE

Software Engineer - Crest Infosystems Pvt Ltd.

Jan 2024 - Present

- Took ownership of end-to-end project delivery, from architecting infrastructure to implementing front-end and back-end features, ensuring scalable and maintainable solutions.
- Designed and implemented custom solutions for tracking employee activity and database optimizations, improving performance and reducing response time.
- I improved system efficiency and user experience across multiple projects by developing and maintaining full-stack web apps with modern technologies like Electron.js, React.js, Node.js, and Sequelize.
- I worked on enterprise-level software solutions, including employee activity tracking systems, point of sale systems, and support ticket systems, utilizing full-stack technologies and custom integrations.
