EXPERIENCE

Software Developer – LancolaTech Ltd.

Jan 2024 – Oct 2025

Designed and implemented in-house solutions using Angular, TypeScript, and Node.js. Gained hands-on experience with front-end frameworks, RESTful API integration, and production deployment through collaboration with senior engineers. Collaborated with cross-function.

Software Developer – Kristec Developers

Aug 2024 – Jul 2025

Built and maintained Kristec's website using React.js and Node.js, delivering a user-friendly and responsive platform. Developed back-end APIs and managed databases with MySQL for efficient data handling and seamless client experiences. Collaborated with cross-functional teams to align tech solutions with business goals, enhancing site functionality and service accessibility.

PROJECTS

The Cube LMS

A learning management System for The Cube Hub that enables learners enrol and take online courses

Assured Brokers Website

A website for an insurance broker company that offers a variety of insurance services and have been offering insurance services for over 40 years

Cyden Distributors Website

The leading distributor of alcoholic beverages in Eldoret. The site displays their catalogue and redirects clients to an external platform for orders.

The Cube Hub Website

An educational platform for tech enthusiasts to learn and enhance their skills. Users can explore courses and sign up directly through the website.

PayHero Devkit NPM Package

A lightweight Node.js SDK for PayHero APIs, enabling developers to initiate STK Push payments, poll transaction statuses, and check wallet balances with a focus on simplicity and webhook-free workflows.
